

## Monoclonal Antibody to PAPP A

### PAPPA

PAPPA, known as pregnancy-associated plasma protein A, is used in screening tests for Down syndrome. Low levels may alternatively predict issues with the placenta, resulting in adverse complications such as intrauterine growth restriction, preeclampsia, placental abruption, premature birth, or fetal death.

### Antibody Clone Recommendation

Conjugated	Coating
5E6	8C4
9H2	8C4
2H9、15D5、5E6、14A4	4G3

### Clinical Data
